

LNG | OUR EXPERTISE IN CONTRACTS AND DISPUTES

In light of the Russian aggression in Ukraine, LNG may become an ever more important part of the EU's energy mix.

Where LNG-related matters hit the desks of our clients, we are ready to assist.

OUR EXPERIENCE

Zeiler Floyd Zadkovich has key expertise in advising on all aspects of **LNG transactions** from assisting in their inception to addressing any problems that may arise along the way.

Our firm is uniquely placed to advise on **English, US and European legal aspects of LNG** contracts. We are a market leading law firm in the niche sector of LNG. We advise on the negotiation and drafting of all transactional documents involved in a LNG deal together with disputes arising in relation to SPAs, MSPAs/CNs and shipping and operational aspects.

Our recent experience includes:

- Representation of major European energy company in negotiation of long-term, high-volume LNG supply agreements with international LNG suppliers.
- Representation of European trading company in respect of a failure to deliver by major international LNG supplier caused by alleged operational reasons.
- Representation of major Central European Energy Company in relation to a failure to load at a North African LNG terminal. The issue was successfully resolved with the client being "kept whole" and the terms of loading and delivery of the cargo re-negotiated.
- Representing a major European trading company in relation to Force Majeure incorrectly declared by a major LNG supplier.
- Preparation and negotiation of various long and mid-term LNG charterparties in support of the fleet expansion for a major LNG supplier.
- Advising various clients in relation to the impact of recent sanctions on performance of existing contracts.

Go to our latest edition of ZFZ Energy Insights for a general overview of recent developments on the European LNG market and the contractual fundamentals in LNG (M)SPAs.

Our partners are ready to discuss our full capabilities and how we can help.
